Climate Atlas

Definitions

- ❖ **Monthly mean temperature:** average of mean temperatures recorded day by day, during the month.
- ❖ **Monthly mean maximum temperature:** average of the maximum temperatures recorded day by day, during the month.
- ❖ **Monthly mean minimum temperature:** average of the minimum temperatures recorded day by day, during the month.
- ❖ **Monthly total precipitation:** es el total de lluvia acumulado durante el mes.

The seasonal and annual values of these parameters are defined in the same way, taking into account a season or one year, instead of one month.

The normal maps that are presented have been obtained from the averages of the parameters indicated, calculated for the period 1961-1990 and 1981-2010.
